

VERSACORE FAMILY · SECURE DATA BRIDGE

VersaCore Link

VersaCore Link is a Windows desktop application that securely connects industrial data sources and exposes selected points as a read-only OPC UA server. Built for plant-floor and air-gapped environments, it enforces a strict no-write security model with full OPC UA security policies and detailed cybersecurity audit logging.

Multi-Protocol Connectors

OPC DA/AE, Modbus TCP, Allen-Bradley EtherNet/IP, OPC UA Client, and GE EGD. Extensible connector model for additional systems.

Read-Only OPC UA Server

Standards-compliant OPC UA address space. Full security policies and modes. No write path to field devices or the published namespace.

GUI-First Configuration

All data sources and points configured in the dark-themed WPF GUI. Browse-to-add tags, Excel import/export, Save/Apply without editing JSON.

Live Monitoring & KPIs

Real-time values, quality, update rates, and throughput. Dashboard tiles for Service health, connections, tags, sessions, and cache updates.

Cybersecurity Audit Logging

Structured, exportable logs suitable for compliance reviews. Local and forwardable event streams with severity and source filtering.

Air-Gapped Friendly

Node-locked licensing with offline activation via Site ID. Zero internet requirement for normal operation, trial, or license validation.

Technical Specifications

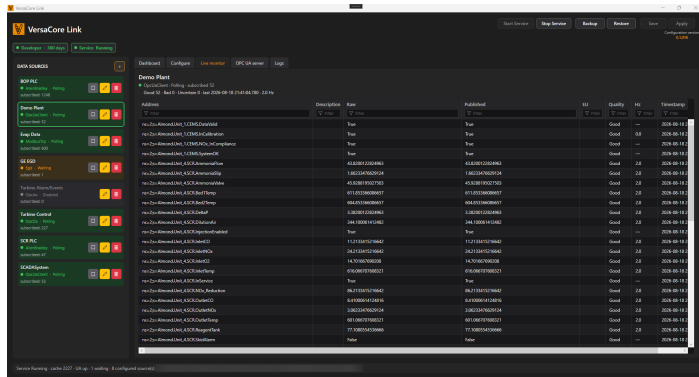

WINDOWS DESKTOP · .NET · OPC FOUNDATION STACK

PLATFORM & RUNTIME	
Platform	Windows 10/11 (x64)
Runtime	.NET 9 / 10
GUI	WPF dark theme
IPC	Named pipes + ACL
Config	JSON (GUI-owned)
Licensing	Node-locked, offline
Install	Offline x64 package

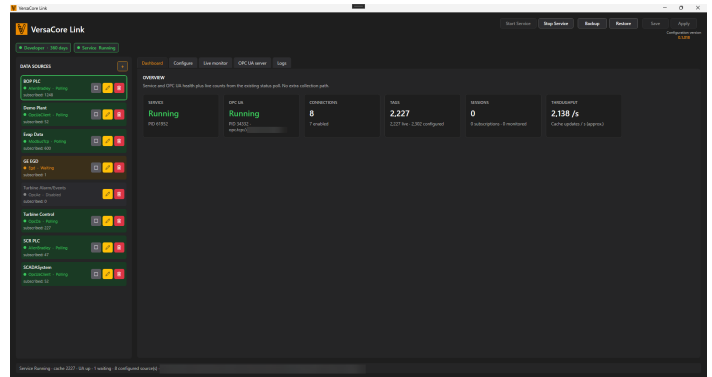

PROTOCOLS & SECURITY	
OPC UA	OPC Foundation .NET
OPC DA	TitaniumAS + native
Modbus	TCP read-only
Allen-Bradley	EtherNet/IP Logix
GE EGD	Consumer
Security	All UA policies
Logging	JSONL + export

Fieldbus & Protocol Support

- OPC UA
- OPC DA
- OPC AE
- Modbus TCP
- EtherNet/IP
- GE EGD

Live monitor — values, quality, Hz, timestamps

Dashboard — Service, OPC UA, connections, throughput

Typical Applications

- Gas turbine & BOP data publishing
- Secure OPC UA gateway for historians
- Multi-protocol plant data aggregation
- Air-gapped / regulated environments
- Controls migration & modernization
- Read-only data sharing to enterprise
- Audit-ready data access trails
- SCADA / DCS point bridging
